Profile

After a thrilling time at PostNL replacing the network company wide, I now have the privilege of working for Ahold Delhaize in the realm of identity and access. More than anything else, Ahold Delhaize teaches me about size, complexity, daringness and perseverance. Because that is what it takes to work in the field of IAM in such a big company. It is exiting, challenging and rewarding. So, yet again working at the edge of technological innovation. And that is exactly what I like and where I want to be; it makes me tick. Working with knowledgeable people with a drive and passion... what can be more fun.

So, when you're looking for an enthusiastic, driven, engaged and social project lead with an insatiable appetite for people, business and technology you are looking for me!
I've been in ICT all my working life. Even before the term ICT was commonly known. And it was never a bore. Through the years I was granted the chance to contribute to projects in several industries like retail, maintenance, telecom industry, utilities, energy market, health care, services and many other lines of business. Predominantly worked with SAP but also in the line of network technology, service and asset management software and the like.
I strongly believe that guiding a project requires both management skills as well as good knowledge of the topic at hand. For instance, if you work on a project that addresses mobility, tablets, geographical systems and new asset structure without being knowledgeable on any of these topics, how can you tell the difference between a risk and an opportunity, how do you communicate with you contractor, etc.
My personal one liner; ICT is the enabler for growth.
Willing to travel domestic and abroad. Good negotiable rate and years of experience for free!

Education and training

Education		Diploma
University	Information management and computer science	Yes (MSc / drs.)
University (HEAO)	Information management and computer science	Yes (BSc / ing.)

Projects

Period : 01/2020 – to date
 Organisation : Ahold Delhaize
 Branche : Retail
 Project name : Program management
 Role : Program manager and Product owner
 Responsibilities : Responsible product owner for a timely and sound execution of all access projects within the global IAM 2020 program for Ahold Delhaize. Besides finance, my responsibilities include stakeholder management, hire and fire, project coherence, business relations and architectural balance.

 Stream holds 10 projects, ranging from multi factor, hello for business, Azure migrations, etc. Roll out covers US East cost, Netherlands, Belgium, Czech Republic, Serbia, Romania and Greece.
 Project result : In progress.

Period : 11/2019 – to date
 Organisation : Ahold Delhaize
 Branche : Retail
 Project name : Various Azure projects
 Role : Project lead
 Responsibilities : In charge of optimizing the connection between the IBM ISIM environment and Microsoft Azure and migrate the authentication and authorisation from IBM ISAM to AAD (dozens of applications). The work is divided over three projects and executed in Agile mode.

 Project result : In progress.

Period : 11/2018 – 06-2020
 Organisation : Ahold Delhaize
 Branche : Retail
 Project name : LDAP re-design and TLS
 Role : Project lead
 Responsibilities : Replace, update and improve the global ISAM LDAP environment and infrastructure, affecting over 400.000 users, thousands of shops and hundreds of applications worldwide. Also responsible for the TLS upgrade to 1.2+ (new ciphers) on a global scale.

 Project result : Both projects delivered, handed over to RUN and products in use.

Period : 11/2017 – 08-2019
 Organisation : Ahold Delhaize
 Branche : Retail
 Project name : Privileged access management
 Role : Project lead and stakeholder manager
 Responsibilities : As project lead responsible for the implementation of a global privileged access solution based on CyberArk. Involves global servers and enterprise applications. Implemented EPV, PSM, PTA, AIM, etc.

 Project result : Cyberark is in use.

Period : 11/2017 – 03/2019
 Organisation : Ahold Delhaize
 Branche : Retail
 Project name : Federated access management
 Role : Project lead
 Responsibilities : Responsible for the implementation of a global federated access solution, based on IBM ISIS. Offers access to global enterprise applications, whilst keeping local authentication and flows.

Project result	:	Project was stopped for strategic reasons.
Period	:	01/2016 – 10/2017
Organisation	:	PostNL
Branche	:	Services and logistics
Project name	:	Future network
Role	:	Projectleider
Responsibilities	:	Responsible for the implementation of a Cisco/Meraki MX based WAN and (W)LAN for all 135 PostNL sites in a replace-all project. Facilitating all work places (20.000), communication and peripheral equipment (Internet of things). The project introduced Network as a Service (NaaS), including a new pricing model and governance structure and adjacent disciplines like authentication and DNS. Negotiations took 5 months, implementation a year and a half.
		
Project result	:	Implemented
Period	:	01/2016 – 12/2016
Organisation	:	PostNL
Branche	:	Services and logistics
Project name	:	DMARC
Role	:	Project lead
Responsibilities	:	PostNL sends over a 100 million emails a year, making it a sought-after spam and phishing victim. Yet, PostNL simply cannot afford to lose customer trust. That is why PostNL – as one of the first in Europe – decided to fully implement DMARC. By guarding over 3000 domains and controlling over 20 email channels with DMARC, PostNL can now guarantee its customers full email security.
		
Project result	:	Implemented
Period	:	08/2014 – 12/2015
Organisation	:	PostNL
Branch	:	Services
Project name	:	Future network
Role	:	Project lead
Responsibilities	:	PostNL is on the brink of a major cloud migration. This requires a whole new approach on connectivity, security and services of the network. As a project lead, I was responsible for the redesign of the entire PostNL network infrastructure. This redesign aims to achieve a future proof, flexible and secure cloud-based network that serves all of PostNL's business requirements for the years to come. (IoT).
		
Project result	:	Initial stage and design phase delivered. Implementation to follow.
Period	:	01/2014 – 08/2014
Organisation	:	PostNL
Branch	:	Services
Project name	:	Topdesk
Role	:	Project lead
Responsibilities	:	Responsible for the installation, configuration and implementation of the service management tool TOPdesk for PostNL. Project aims to replace five different software packages and serves all support engineers and self-service users (in total some 500 engineers and 60.000 self-service users).
		
Project result	:	Topdesk is in use.
Period	:	11/2013 – 04/2014
Organisation	:	PostNL
Branch	:	Services
Project name	:	SAML
Role	:	Project lead

Responsibilities		:	Responsible for the installation, configuration and implementation of the SAML protocol for the PostNL SAP landscape. Project prepares for the Cloud migration and will result in a working and secure Cloud landscape (IaaS) for SAP.
			
Project result		:	SAML is in use, delivered on time and in budget.
Period		:	10/2009 – 10/2013
Organisation		:	Eneco ICT
Branch		:	Energy / Utilities
Project name		:	Various SAP PM projects, incl. tablets, GIS systems
Period		:	06/2008 - 10/2009
Organisation		:	Parnassia Bavo group
Branch		:	Health sector (mental)
Project name		:	Various
Role		:	Project lead
Responsibilities		:	Responsible for the design, roll out and guidance of a SAP maintenance and support organisation within one of the large-size health care companies in the Netherlands.
End result		:	In use
Period		:	2005 - 2008
Organisation		:	Via Ordina
Branch		:	Police, Harbour facilities, logistics, wholesale
Project name		:	Various SAP, CMM maturity
Role		:	Project lead
Period		:	2002 – 2005
Organisation		:	Via Ordina
Branch		:	Large Telecom provider (BEN and T-Mobile)
Project		:	Various SAP projects (eg merger), governance, CMM.
Role		:	Project lead
Branch		:	Oil and gas industry (Shell / SSI)
Function		:	Team lead and line manager
Dates		:	1999 - 2000
Assignment		:	Transition project SAP implementation Norske Shell, Shell Gabon and Shell Atlas
Branch		:	Aerospace and Defence
Function		:	Consultant system development
Dates		:	1989 - 1999
Assignment		:	Various, such as SAP business consultant for aircraft maintenance and overhaul.
